PROFESSIONAL SUMMARY

Backend Developer specializing in Python & Django with hands-on experience building scalable REST APIs and optimizing database performance. Built production-style backend systems with authentication, task queues, and third-party integrations.

EDUCATION

B.Sc. Computer Science – Benha University (2022 – 2026)

Relevant Coursework: Data Structures, Algorithms, Databases, Software Engineering

TECHNICAL SKILLS

Python (Advanced), C/C++ (Intermediate), SQL

Django, Django REST Framework, Celery

PostgreSQL, MySQL, SQLite

Docker (Basic), Linux, Git/GitHub

REST APIs, JWT Authentication

PROJECTS

E-commerce REST API

- Built scalable backend system using Django & DRF
- Reduced response time by 30% using query optimization
- Implemented authentication using JWT

Task Management System

- Built background job system using Celery
 - Integrated APIs (SendGrid, Twilio)
 - Improved automation efficiency
-

ACHIEVEMENTS

- Solved 100+ problems on Codeforces
- Built 2 backend production-style projects

LANGUAGES

Arabic (Native), English (Intermediate)
